

# FOGLight®

The **FOGLight (Fall Of Ground)** indicator is an early warning device designed to detect and warn mining crews of separation in the rock above, helping to prevent losses and providing a safer work environment underground.

The FOGLight is simple to install, manufactured from tough materials and has a highly visible flashing LED indicator to highlight potentially unsafe movement in the hanging wall.

- Simple to install
- Easily visible
- Efficient
- Cost effective
- Tamper proof
- 12 month plus battery life
- Various lengths available up to 6.0m
- Various displacement settings available ranging from 1.5mm to 6.5mm

*Green light indicates a safe working environment*

*Red light indicates separation in the strata above*
